

INDUSTRIAL PIPING SPECIALISTS, INC.

800-725-9100 • ipipes.com

AN INDUSTRY LEADER BUILT ON QUALITY & EXPERIENCE

Industrial Piping Specialists is a PVF distributor with a long-standing commitment to the needs of our customers. Since 1986, we have opened 14 U.S. locations where complete and comprehensive

product inventories are maintained to properly serve the energy, energy-related, midstream, petrochemical, and general construction industries, unlike traditional hub and spoke systems.

Carved by years of experience, our internal process upholds error-free ordering and fulfillment. State-of-the-art machinery and expertise allow us to maintain cutting-edge quality, even with the most specific customer needs. Light manufacturing capabilities allow us to furnish materials that are cut, threaded, beveled, profiled, and machined to a final configuration. This, combined with the coverage provided by our expanse of 1 million square feet of inventory space over 14 locations, allows us to minimize time-to-shipment while maximizing customer satisfaction.

SERVICES

- Pipe Cutting/Mitering
- Beveling/Threading
- Profiling
- Custom Production Kits
- Specialized CNC Machining
- Valve Automation
- Tank Battery & Well Hook Up Trailers
- Job Site Inventories/VMI
- Logistics, Shipping & Expediting Services
- Computer & Process Improvement Technology
- Customized Online Reporting
- Automated MTR Retrieval
- Project Management & Material Expediting

PRODUCTS

Carbon & Stainless Steel Pipe, Valves, Automation, Fittings & Flanges

We stock a wide variety of product materials from carefully selected manufacturers that have demonstrated a history of quality/trouble-free products and on-time deliveries. Products are purchased for inventory with detailed specifications that in many cases exceed ASTM requirements.

Inventories are customized to provide a ready supply of materials that meet the specific needs of our energy-related, MRO, fabrication and midstream customers.

FLANGES • FITTINGS • PIPE • VALVES • LONG WELD NECKS

CARBON • STAINLESS • LOW TEMP • CHROME-MOLY • HIGH YIELD

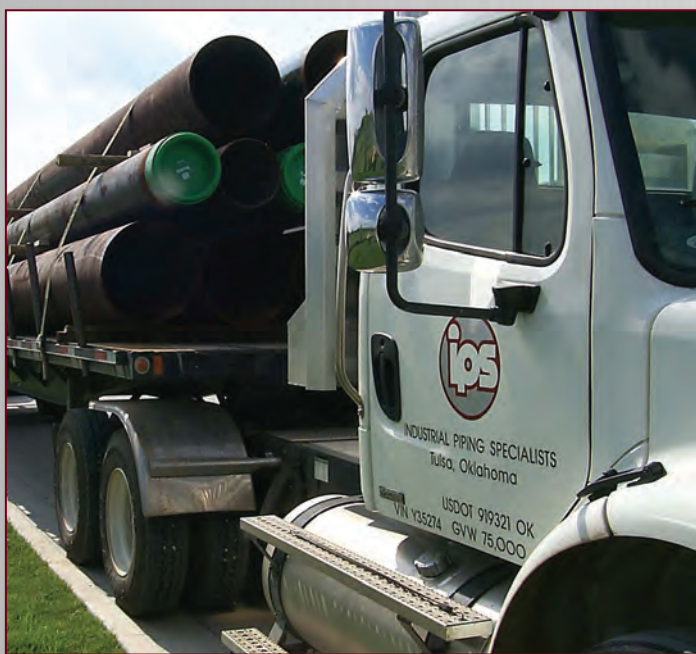

QUALITY CONTROL/ TECHNICAL INNOVATION

At IPS, quality control and technology are tightly integrated. We ensure that for each quality control process, there is a corresponding human, hardware, or software platform defined. Our meticulous use of technology allows us to provide instant feedback to personnel, thus reducing errors and improving customer satisfaction.

Quality control is central to our operations from order entry through shipment as outlined in our ISO-9002 based quality control manual. We recognize that to be competitive and to satisfy customers, the order fulfillment process has to be quick, easy, and error-free.

IPS stands apart in the field by using technology to improve all aspects of our business, from quality assurance to employee safety and from order entry to shipment tracking.

At every step of the way, our detailed process enhancements improve overall customer satisfaction and reduce errors. In the end, it's not our goal to meet your expectations... We expect to exceed them.

AUTOMATION TECHNOLOGY/MTR

Our proprietary technology was developed in-house and gives us cutting-edge accuracy and speed of operations. We extend our reach directly to our customers and suppliers through creative use of web services, customer intranets, and information portals.

Through our customer portal, you will be able to access our unique MTR Retrieval site, as well as data exchange formats designed specifically for your needs.

Additionally, our in-house design staff is capable of integrating IPS's technology platform with your own to provide seamless information sharing.
